

Since those who attend the flight school are the best representatives of the school's training effectiveness and distinctiveness, it would be a terrific testimony to have you also wearing the School's clothing, therefore, all 1st U.S. R/C Flight School and Scott Airshows shirts and hats are available below cost to current and past enrollees.

Note: Due to constantly changing inventory, when you decide which items you like, email Dave (1usrcfs@gmail.com) to check on the availability in the size(s) you require.

Must have been the gear's fault!

\$15

#007 Gray Short Sleeve T-shirt

M - L - XL - XXL - XXXL

This shirt pokes fun at all the model flyers who come up with alternative reasons for damage that occurs upon landing - other than poor piloting.

*It would have been an 8.5
until you fixed it!*

1. Parallel (Targets, G)
2. Wings Levels Entries
3. One Step at a Time
4. Do Not Fix!

Reminding attendees of the fundamentals that ensure consistency, including the importance of not trying to fix the maneuver, but rather, use the opportunity to let the airplane show you what's needed to do better next time.

*No Matter What...
"Keep Flying the Plane!"*

#010 Gray Short Sleeve T-shirt

M - L - XL - XXL - XXXL

An abbreviation on the principle that no matter what else is going on, e.g., power setting, altitude, maintaining or regaining control of the airplane using aileron-and-elevator always takes priority -- even if that means "continuing to fly the plane all the way to the crash." As a result, there will be fewer crashes, or at least there will be less damage compared to what happens when preoccupied with throttle/altitude at the price of controlling the airplane.

\$15

Stressing the key to precision flying isn't getting better at making corrections, but proactively applying the correct inputs in the first place, thus bypassing the need for corrections altogether! A.k.a., if the outcome is less than ideal, look to change your inputs rather than trying to fix the deviation after the fact.
